MULTIPLE MANAGEMENT

Each device is identified via unique and customizable ID. Possibility to manage independently multiple devices placed in different areas of the plant.

ORGANIZING MESSAGES

- MyPage+ is run directly via a computer connected to the network with a web interface
- A library of customizable templates is available on the web interface. You can define flexibility of duration and frequency content

FUNCTIONS

- display of scheduled or instant messages
- display of company sync timing with NTP (Network Time Protocol)
- display of videos, images and text
- user-friendly content management
- management software accessible from any computer on the network
- different levels of authorization for device management
- display of emergency messages with priority over other content
- connection to SCADA management system to visualize parameters as temperature, differential room pressure, relative humidity, particle counting, alarms, etc.
